

BOTOX® Cosmetic FACT SHEET

Benefits –

BOTOX® Cosmetic is an anti-aging injection treatment that blocks specific nerve impulses which control muscle contractions in the face. The muscles responsible for expression lines are relaxed, thereby preventing wrinkles from forming. The appearance of existing wrinkles, which have developed over the years, can also be improved. Additionally, BOTOX® Cosmetic can be used to create symmetry when the face has become asymmetric due to certain muscle disorders or conditions.

Description of Treatment –

During a BOTOX® Cosmetic treatment, the area to be injected will be cleansed with alcohol swabs. No anesthetic is necessary. Clients can request a topical anesthetic cream for comfort. The physician may request that specific expressions be made to identify facial muscle contractions and mark near the injection sites with temporary ink. Several quick injections will then be made in the region to be treated.

A typical BOTOX® Cosmetic treatment takes approximately 10-15 minutes, and most clients return to normal activities directly after the injections.

Visible results after a BOTOX® Cosmetic treatment generally appear 5-10 days after the treatment. The results of a BOTOX® Cosmetic treatment last an average of 4-6 months. After which, facial appearances will return to pre-treatment shape if additional treatments are not repeated.

Average Cost -

The average cost of BOTOX® Cosmetic can range \$350-450 per treated area, or approximately \$22 per unit. These prices are greatly affected by the location of the provider and the area treated. National Laser Institute offers this procedure at more the half the retail price, at \$7 to \$11 per unit

About National Laser Institute -

Founded by Louis Silberman in 2003, National Laser Institute Medical Spa boasts discount luxury locations in both Texas and Arizona. The spa specializes in the most advanced rejuvenation and anti-aging procedures in the marketplace. Its team of treatment providers represents some of the nation's top experts in medical aesthetics, including leading educators in the cosmetic laser field.
