## VelaShape™ Cellulite Reduction FACT SHEET

### *Benefits -*

VelaShape™ is a non-surgical, non-invasive and FDA approved treatment for body reshaping and cellulite reduction. VelaShape™ utilizes elōs™ technology (electrical-optical synergy), and increases the amount of energy an aesthetic device can deliver. Up to 10 times more heat is transported to the fat tissue than other body contouring procedures. This allows for greater localized metabolism increases, reduced treatment times and fewer sessions. VelaShape™ treats both the deeper tissue and upper layers of the skin. Clients report a measurable reduction in fat layers, circumference and cellulite appearance. Other reported benefits include improved circulation, decreased muscle aches and an overall increase in self-esteem.

### *Description of Treatment -*

VelaShape™ utilizes elōs technology, which combines Bi-Polar radiofrequency (RF), infrared light energies, plus negative pressure and tissue manipulation in order to increase oxygen levels in single-cell bodies by heating the skin. The metabolism of stored energy rises with the increase of oxygen and heat to promote shrinkage of fat chambers. Vacuum designed rollers on the aesthetic medical device are manipulated over the surface of the skin, multiple times, to effectively deliver the energy.

Prior to each VelaShape™ procedure, clients are asked to maintain a healthy lifestyle and stay at their present weight. Before the day of treatment, providers recommend shaving and exfoliating with a body scrub to eliminate any body oils, sunless tanning products or creams.

An individual VelaShape™ treatment takes approximately 45 minutes to 1 hour, and clients typically report visible results in 4 treatments. A warming sensation throughout the entire process can be expected. There are no substantial reports of down time for VelaShape™, and clients usually return to daily activities immediately following the treatment.

### *Average Cost -*

The average cost of one VelaShape™ treatment can start at \$300. The most optimal results are seen within 3-4 treatments, which can price out to \$1,200 for a full VelaShape™ treatment cycle. These prices are greatly affected by the location of the provider and condition of the area, or areas treated. National Laser Institute offers this procedure at less than half the retail price at just \$125 a treatment.
