Nurse offers Botox at Great Falls Clinic

Carol Hanson, a registered nurse, offers Botox and Dermal Fillers at the Great Falls Clinic.

Hanson recently completed training in these services from the National Laser Institute and works under the supervision of Dr. Emilia Ploplys, plastic surgeon.

Botox is a simple, nonsurgical treatment that temporarily smoothes moderate to severe frown lines between the brows in people 18 to 65 years old.

Dermal Fillers are injected in to the face to improve the appearance of wrinkles and folds and to increase volume in the skin and subcutaneous tissues.

The Great Falls Clinic Plastic Surgery Department is accepting new patients and scheduling appointments at 771-3423.
