**NATIONAL LASER INSTITUTE GIVES  
MEDICAL AESTHETICS EDUCATION A MAKEOVER**

*Medical Professionals Learn to Perform the Latest Cosmetic Procedures in a  
Luxury-Class Environment, Adding Valuable Services to Their Businesses*

According to *Aesthetics Buyers Guide*, over 30 million hair removal, skin rejuvenation, tattoo removal and other laser and intense pulse light (IPL) procedures were performed in 2006 in the United States. These earned more than 8.5 billion dollars for practitioners. With the demand for trained professionals skyrocketing, National Laser Institute (NLI) has risen to the head of the class in the world of cosmetic procedure training and continuing medical education.

From Botox® and Restylane® to hair removal and photo facial rejuvenation treatments, doctors and nurses are following the industry's biggest trend by learning how to perform a variety of these in-demand cosmetic procedures. NLI offers flexible weekend courses to fit any schedule, covering advanced injectable and laser services during two days of concentrated education. Students now have the option of attending the institute's 10,000 square foot facility in beautiful Scottsdale, Arizona, as well as the brand-new Las Vegas, Nevada campus.

As one of the few schools in the country with an on-site retail spa, students not only learn the necessary

(more)

skills to operate safely but also have the opportunity to practice their techniques on real patients. Dr. Betty Davis and Dr. Sasha Jazayeri, two of the industry's finest dermatologists, bring their years of professional experience and knowledge to the learning process. Their first-class teaching style, combined with small class sizes, offers a one-of-a-kind hands-on education.

The unique, personalized approach offered by NLI has received rave reviews from its graduates. "I feel like I am totally prepared to incorporate Botox and dermal fillers into my practice. The hands on experience with physicians' instruction were what I was looking for in a course," said Harry Froeschke, MD.

The increase in income added to practices that are able to provide these services is only one of the many benefits gained through participation in the comprehensive courses offered at NLI. In accordance with the requirements of the Accreditation Council for Continuing Medical Education (ACCME), graduates have the ability to earn a maximum of 34 AMA PRA category 1 credits.

### **About National Laser Institute**

National Laser Institute was founded in 2003 and is committed to providing the most extensive and comprehensive medical aesthetic and laser training program in the country. Headquartered in Scottsdale, Arizona with a new location in Las Vegas, Nevada, NLI is also expanding to Dallas, San Francisco, Chicago, New York and Toronto over the next two years.
